Softball is a game of contact. Unfortunately, overuse injuries can often result. Whether you are a beginner to the game of softball, or a seasoned pitcher and hitter, you can increase your chances of avoiding common injuries by knowing the fundamentals of the softball swing. Play The Force Mentally practice hitting the ball with the force of the bat head. As the bat head stops on the ball at the top of your stride, you must generate maximum force and make sure that the ball clears the batter's box. Successful swinger knows how to generate the momentum at the top of the swing. The "spine" of the bat head is the point where maximum force can be applied to the ball. Don't swing fast and hard right away. For beginners, feel free to shorten your hand action, keeping the bat against your shoulder. Then, as you gain confidence, increase the tempo and strength of your swing. Learn the Balance A softball game lasts about 90 minutes. In that time, your body may need to produce up to 30,000-40,000 watts of energy. Learn the proper balance and coordination of your body to make sure the energy from your leg pushes the bat head into the ball at the top of the swing. Practice your fundamentals on the field. Hitting the ball within the proper distance from the plate helps to keep balance and timing. A well-balanced softball hitter takes all factors of the swing into account as he/she approaches the batter's box. The Good News Practicing and aligning your body to generate energy is a challenge. It is easy to overstretch with the bat head and miss the ball. That is when you have to add strength, energy, and accuracy. 04aeff104c
